

TxDOT/HAS Dimond Knoll Screening Project – June 15, 2013  
Bulletin #14

A bunch of us were at TAS Field School and missed screening this past weekend, but the rest of the faithful crew showed up including the newest “new guy” Charles Zipprian who found the point of the day! Thanks to John Rich and Tracy Connell for these great photos!

Artifacts recovered June 15<sup>th</sup> from Pile 3.

After screening each day we clean the artifacts in the field and sort and bag them, ready for our Monday labs. Dr. Jason got cleaning duty this week.

Charles Zipprian found a point his first day on the screens!!!

The crew checks the artifact tray before sorting the pottery, flakes, shell, animal bone and diagnostic artifacts into separate bags.

It was a hot day out there!

A well-deserved rest after a hot day's work! We have the best field crew in Texas!!!!
