

TxDOT/HAS Dimond Knoll Screening Project – July 26 - 27, 2013  
Bulletin #17

On Friday, July 26, HAS hosted a dozen science teachers from around the State of Texas who were attending a conference at the Cypress Conference Center. HAS members Sharon Menegaz and Kathleen Hughes were also attending the conference and suggested a field trip for attendees who wanted to learn a little about archeology... hands on and dirty! Thanks for joining us!!!! We had a great day! Please come back and screen with us again!

The crew on Friday included the visiting science teachers and several HAS members.

Who's having fun in the dirt???

Sharon Menegaz supervises Screen 1.

Bob Sewell worked Screen 4 with James Horner and his son. James is a teacher at Cyfair ISD.

Louis Aulbach was on the screen that produced two nice points, one found by Lee Keyes of McAllen ISD

The group got a great presentation by Dr. Roger Moore who was the Project Archeologist on the Dimond Knoll Archeological project, 41HR796.

TxDOT/HAS Dimond Knoll Screening Project – July 26 - 27, 2013  
Bulletin #17

Lee Keyes finds the first point of the day.

Talk about a coincidence. Cathy Bairley, left, is a science teacher at Meadows Elementary School at Fort Hood, Texas. HAS President, Linda Gorski, right, attended 5<sup>th</sup> and 6<sup>th</sup> grades at Meadows back in 1955 and 1956! Great chatting with you, Cathy!

We even got Dr. Moore to screen with us for a bit!

Linda Gorski and Bob Sewell celebrate the almost end of enormous Pile 1. We saved this one small mound to screen this coming Saturday (Aug. 3) when most of the regular team will be there. Come join us!!!!

Some of the points, tools, pottery and even a tooth that were recovered this past weekend from Pile 1.
