

H O U S T O N A R C H E O L O G I C A L S O C I E T Y

Friday, January 11, 1973

Room 2 - 7:30 PM

MUSEUM OF NATURAL SCIENCE

SPEAKER: Dr. Thomas R. Hester  
Assistant Professor of Anthropology, University of  
Texas at San Antonio

SUBJECT: Perishable Artifacts from a Cave in Western Nevada.  
Dr. Hester will discuss a wide range of artifacts from a  
shaft cove in western Nevada (the Great Basin). These  
materials are currently under analysis by Hester, and  
include a spearthrower with attached boatstone weight, a  
flint-knapper's pouch, a pouch containing several hafted  
stone knives, and many other normally perishable artifacts.  
The spearthrower has been radiocarbon-dated at greater than  
6030 B.C., making it the earliest documented spearthrower  
in the New World. Microscopic analysis of the hafted stone  
knives have provided clear evidence as to their actual  
function. The flint-knapper's kit contains pressure-flaking  
tools, and over 100 finished and unfinished projectile points.
