## INTRODUCTION

This is the thirteenth of a continually updated series covering the literature of the archeology of Southeast Texas, including prehistoric and historic Indians. This region of Texas is defined here as the twenty-one county area shown on the map in Figure 1.

Others are invited to supply information for future issues to make this bibliography as complete as possible. Moore (1989) has published a bibliography that covers a slightly different total area. Reports on CRM archeology that convey little data have not been included here, because this bibliography is intended for research use. Many CRM site reports that may have significant data are not generally available because of limited distributions.

It should be noted that the Houston Archeological Society Newsletter was renamed the Houston Archeological Society Journal, starting with No. 72, to more accurately reflect its contents. Some selected references on specific subject areas are given on pages 2,3 to aid the general reader. Lists are included here to cross-index references by site number for inland and coastal margin areas of this region.

Abbreviations used here are:

BTAS	Bulletin of the Texas Archeological Society
BTAPS	Bulletin of the Texas Arch. & Paleontological Society
HASN	Houston Archeological Society Newsletter
JHAS	Journal of the Houston Archeological Society
LT	La Tierra, Southern Texas Arch. Association
TA	Texas Archeology, TAS newsletter
